

# Your strategic partner for the Healthcare sector

# Who We Are

## Your strategic partner for the Medical business

Nippon Gases Healthcare is the dedicated medical division of Nippon Gases, delivering high-quality healthcare solutions across Europe. As part of the global Nippon Sanso Holdings Corporation, we combine deep expertise in medical gases with the strength and reliability of a multinational organisation.

When it comes to patients, our responsibilities acquire a different dimension. Their wellness is at the centre of what we do.

Our team of professionals formed by doctors, nurses, physiotherapists, pharmacists, psychologists and engineers among others, has one single commitment: making life better for those we serve.

# Homecare

## Comprehensive Therapies for Clinical Excellence at Home

At Nippon Gases, we extend high-quality therapies into the home—ensuring continuity of care, patient safety, and diagnostics services.

Our Focus Areas:

### Respiratory Therapies on Chronic Patients:

- Oxygen therapy for chronic respiratory diseases
- Sleep apnea management (CPAP & BiPAP)
- Ventilation Therapy: - Life supporting
  - Life sustaining

### Non Respiratory Therapies:

- Nutrition Service: Nutritional support tailored to metabolic needs

### Our Commitment

- Complete therapy management with clinically validated protocols
- Expert medical consultation combined with advanced AI technology support
- Personalised patient support to improve adherence

---

Empowering physicians to deliver patient-centered care - enhancing quality of life while maintaining therapeutic integrity.

---

# Hospital Care

## Advanced Medical Gas Solutions for Hospital Excellence

We provide a full spectrum of medical gases and integrated services to support safe, efficient, and high-quality care in hospitals.

### Core Medical Gases:

- Oxygen (O<sub>2</sub>): Respiratory therapy, hyperbaric oxygen
- Nitric Oxide (NO): Neonatal care, pulmonary hypertension
- Medical Air: Ventilation support, air cryoablation
- Carbon Dioxide (CO<sub>2</sub>): Laparoscopy, endoscopy
- NINOXAN (N<sub>2</sub>O + O<sub>2</sub>): Conscious sedation
- Helium (He): MRI cooling, Heliox therapy
- Nitrogen (N): Cryobiology, MRI, medical gas supply systems

### Integrated Services:

- Total gas management: supply, storage, distribution
- Environmental monitoring & compliance
- Staff training & emergency response
- Continuous technical support

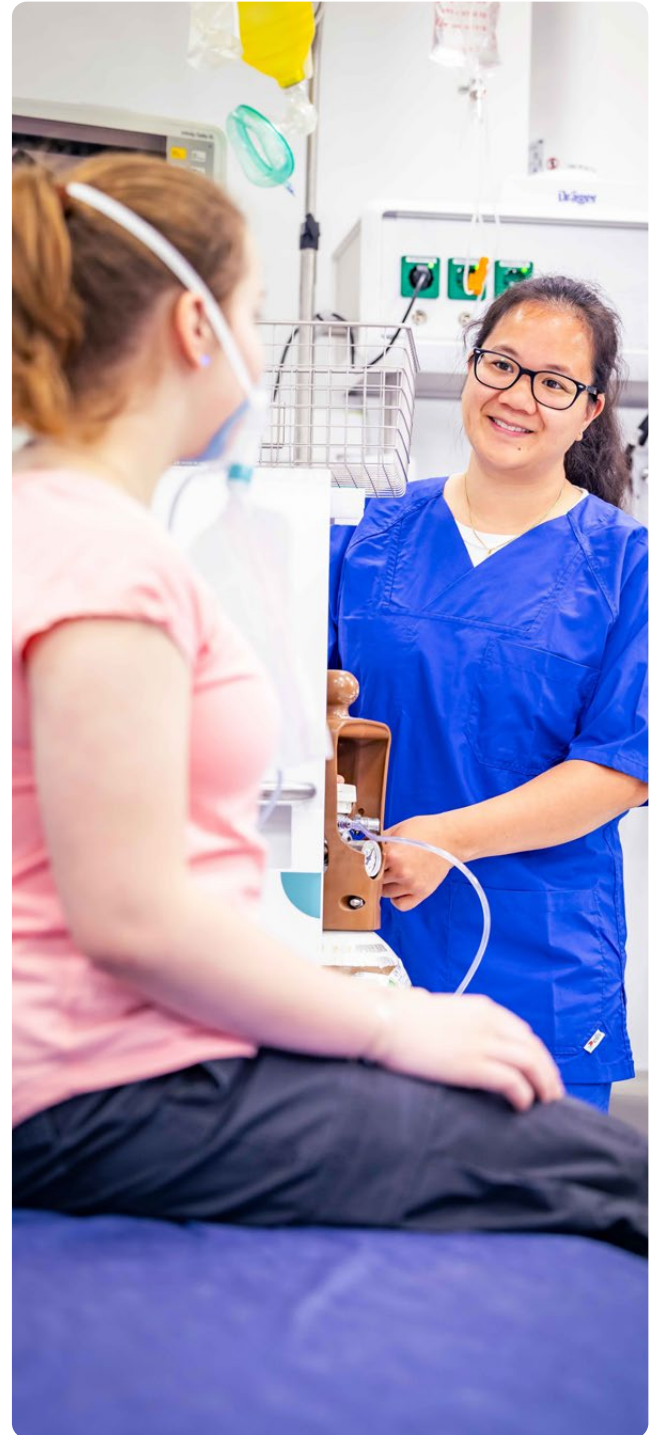

### Specialised Support:

- Cryopreservation for sensitive biological materials
- Helium refilling services for MRI systems
- Legionella risk management for hospital hygiene

---

Your trusted partner in clinical expertise, technical reliability, and customised service - enabling excellence in patient care.

---

# Commitment to Quality and Innovation

As a trusted partner to healthcare providers, Nippon Gases is dedicated to advancing patient care through state-of-the-art technology and innovative gas solutions.

Our commitment to excellence ensures that healthcare facilities receive the reliable, safe, and tailored support they need to deliver outstanding care.
